Regulatory Requirements for New and Generic Drugs

22. A person wishing to market a new drug that has not previously been approved by the U.S. Food and Drug Administration ("FDA") (a "pioneering" drug) must file a New Drug

Application (“NDA”) with FDA demonstrating that the drug is safe and effective for its intended use. 21 U.S.C. § 355(b).

23. A person wishing to market a generic copy of a drug that previously has been approved by FDA may follow a truncated approval process by filing an Abbreviated New Drug Application (“ANDA”) for a generic version of that drug. In the ANDA, the applicant must demonstrate, among other things, bioequivalence of the generic copy with the pioneering drug. 21 U.S.C. § 355(j)(2)(A)(iv).

24. Unlike an NDA applicant, an ANDA applicant is not required to include safety and effectiveness data. Instead, the ANDA applicant is permitted to rely on the approval of the NDA applicant’s drug—in essence, piggybacking on the NDA application and safety and effectiveness conclusions. 21 U.S.C. § 355(j).

25. Nor does an ANDA applicant establish any new conditions of use for the proposed drug product. Instead, an ANDA applicant may seek approval only for conditions of use that previously have been approved in connection with an approved NDA. 21 U.S.C. § 355(j)(2)(A)(i).

The Approved Drug Product

26. Amarin Pharmaceuticals Ireland Limited is the current holder of NDA No. 202057, for 1g icosapent ethyl capsules, which was first approved by FDA on July 26, 2012. Amarin Pharma, Inc. is Amarin Pharmaceuticals Ireland Limited’s agent in the United States for purposes of communicating with FDA regarding NDA No. 202057. Amarin Pharmaceuticals Ireland Limited and Amarin Pharma, Inc. market the approved drug product under the tradename VASCEPA®.

27. VASCEPA[®] is indicated as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. A true, correct, and complete copy of the Prescribing Information for VASCEPA[®] approved in NDA No. 202057 is attached as Exhibit A.

28. FDA has listed the ‘728, ‘715, ‘677, ‘652, ‘920, ‘446, ‘335, ‘399, ‘560, ‘650, ‘225, ‘929, ‘698, ‘372, ‘521, and ‘594 Patents in the Orange Book—formally known as *Approved Drug Products With Therapeutic Equivalence Evaluations*—in connection with NDA No. 202057.

29. Amarin Pharmaceuticals Ireland Limited is the owner of the ‘728, ‘715, ‘677, ‘652, ‘920, ‘446, ‘335, ‘399, ‘560, ‘650, ‘225, ‘929, ‘698, ‘372, ‘521, and ‘594 Patents.

ANDA No. 205381

30. Upon information and belief, on or before April 7, 2014, Watson submitted to FDA an ANDA (ANDA No. 205381) with paragraph IV certifications under section 505(j)(2)(A)(vii)(IV) of the Federal Food, Drug, and Cosmetic Act (“FDCA”), 21 U.S.C. § 355(j)(2)(A)(vii)(IV), for 1g icosapent ethyl capsules purportedly bioequivalent to VASCEPA[®]. The purpose of the ANDA is to obtain approval under section 505(j) of the FDCA to engage in the commercial manufacture and sale of a generic VASCEPA[®] product.

31. Upon information and belief, the indication set forth in the proposed labeling submitted in ANDA No. 205381 for the generic VASCEPA[®] product is to reduce triglyceride levels in adult patients with severe hypertriglyceridemia, *i.e.*, the same indication as that set forth in the approved labeling for VASCEPA[®].

32. Upon information and belief, Watson sent Amarin a letter dated April 7, 2014, which was received by Amarin on April 9, 2014 (the “Notice Letter”). The Notice Letter represented that Watson had submitted to FDA an ANDA, No. 205381, with a paragraph IV

certification for the ‘728, ‘715, ‘677, ‘652, ‘920, ‘446, ‘335, ‘399, ‘560, ‘650, ‘225, ‘929, ‘698, ‘372, ‘521, and ‘594 Patents.

33. Upon information and belief, the purpose of the ANDA and paragraph IV certifications is to obtain approval under section 505(j) of the FDCA to engage in the commercial manufacture and sale of a generic version of VASCEPA[®] before the expiration of the patents listed in the Orange Book for NDA No. 202057. Hence, Watson’s purpose in submitting ANDA No. 205381 is to market products described therein before expiration of the ‘728, ‘715, ‘677, ‘652, ‘920, ‘446, ‘335, ‘399, ‘560, ‘650, ‘225, ‘929, ‘698, ‘372, ‘521, and ‘594 Patents.

34. This case is an exceptional one, and Plaintiffs are entitled to an award of their reasonable attorneys’ fees under 35 U.S.C. § 285.

Count I: Patent Infringement of the ‘728 Patent

35. Plaintiffs incorporate by reference the allegations contained in paragraphs 1 to 34 above.

36. United States Patent No. 8,293,728, entitled “METHODS OF TREATING HYPERTRIGLYCERIDEMIA,” was duly and legally issued by the United States Patent and Trademark Office on October 23, 2012. Plaintiff Amarin Pharmaceuticals Ireland Limited is the owner of the ‘728 Patent. A true and complete copy of the ‘728 Patent is attached hereto as Exhibit B.

37. Upon information and belief, Watson submitted ANDA No. 205381 to FDA seeking approval to engage in the commercial manufacture, use, offer for sale, and sale of a generic version of VASCEPA[®] before the expiration of the ‘728 Patent.

38. Watson's manufacture, use, offer for sale, or sale of such product would infringe the claims of the '728 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

39. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson's ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the '728 Patent. Upon information and belief, this infringement will occur at Watson's behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this administration with knowledge that it is in contravention of Plaintiffs' rights under the '728 Patent.

40. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '728 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

41. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the '728 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson's generic version of VASCEPA[®].

42. Watson gave written notice of its certification of invalidity and/or non-infringement of the '728 Patent, alleging that claims of the '728 Patent are invalid and that certain claims would not be infringed by Watson's generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the '728 Patent.

43. Watson has infringed the ‘728 Patent under 35 U.S.C. § 271(e)(2)(A) by virtue of submitting ANDA No. 205381 with a paragraph IV certification and seeking FDA approval of ANDA No. 205381 to market a generic version of VASCEPA[®] prior to the expiration of the ‘728 Patent. Moreover, if Watson commercially uses, offers for sale, or sells its generic version of VASCEPA[®], or induces or contributes to such conduct, it would further infringe the ‘728 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

44. Plaintiffs will be irreparably harmed if Watson is not enjoined from infringing or actively inducing or contributing to infringement of the ‘728 Patent. Plaintiffs do not have an adequate remedy at law.

Count II: Patent Infringement of the ‘715 Patent

45. Plaintiffs incorporate by reference the allegations contained in paragraphs 1 to 44 above.

46. United States Patent No. 8,318,715, entitled “METHODS OF TREATING HYPERTRIGLYCERIDEMIA,” was duly and legally issued by the United States Patent and Trademark Office on November 27, 2012. Plaintiff Amarin Pharmaceuticals Ireland Limited is the owner of the ‘715 Patent. A true and complete copy of the ‘715 Patent is attached hereto as Exhibit C.

47. Upon information and belief, Watson submitted ANDA No. 205381 to FDA seeking approval to engage in the commercial manufacture, use, offer for sale, and sale of a generic version of VASCEPA[®] before the expiration of the ‘715 Patent.

48. Watson’s manufacture, use, offer for sale, or sale of such product would infringe the claims of the ‘715 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

49. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson's ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the '715 Patent. Upon information and belief, this infringement will occur at Watson's behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this administration with knowledge that it is in contravention of Plaintiffs' rights under the '715 Patent.

50. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '715 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

51. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the '715 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson's generic version of VASCEPA[®].

52. Watson gave written notice of its certification of invalidity and/or non-infringement of the '715 Patent, alleging that claims of the '715 Patent are invalid and that certain claims would not be infringed by Watson's generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the '715 Patent.

53. Watson has infringed the '715 Patent under 35 U.S.C. § 271(e)(2)(A) by virtue of submitting ANDA No. 205381 with a paragraph IV certification and seeking FDA approval of

ANDA No. 205381 to market a generic version of VASCEPA[®] prior to the expiration of the ‘715 Patent. Moreover, if Watson commercially uses, offers for sale, or sells its generic version of VASCEPA[®], or induces or contributes to such conduct, it would further infringe the ‘715 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

54. Plaintiffs will be irreparably harmed if Watson is not enjoined from infringing or actively inducing or contributing to infringement of the ‘715 Patent. Plaintiffs do not have an adequate remedy at law.

Count III: Patent Infringement of the ‘677 Patent

55. Plaintiffs incorporate by reference the allegations contained in paragraphs 1 to 54 above.

56. United States Patent No. 8,357,677, entitled “METHODS OF TREATING HYPERTRIGLYCERIDEMIA,” was duly and legally issued by the United States Patent and Trademark Office on January 22, 2013. Plaintiff Amarin Pharmaceuticals Ireland Limited is the owner of the ‘677 Patent. A true and complete copy of the ‘677 Patent is attached hereto as Exhibit D.

57. Upon information and belief, Watson submitted ANDA No. 205381 to FDA seeking approval to engage in the commercial manufacture, use, offer for sale, and sale of a generic version of VASCEPA[®] before the expiration of the ‘677 Patent.

58. Watson’s manufacture, use, offer for sale, or sale of such product would infringe the claims of the ‘677 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

59. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson’s ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe

hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the ‘677 Patent. Upon information and belief, this infringement will occur at Watson’s behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this administration with knowledge that it is in contravention of Plaintiffs’ rights under the ‘677 Patent.

60. Watson’s manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the ‘677 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

61. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the ‘677 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson’s generic version of VASCEPA[®].

62. Watson gave written notice of its certification of invalidity and/or non-infringement of the ‘677 Patent, alleging that claims of the ‘677 Patent are invalid and that certain claims would not be infringed by Watson’s generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the ‘677 Patent.

63. Watson has infringed the ‘677 Patent under 35 U.S.C. § 271(e)(2)(A) by virtue of submitting ANDA No. 205381 with a paragraph IV certification and seeking FDA approval of ANDA No. 205381 to market a generic version of VASCEPA[®] prior to the expiration of the ‘677 Patent. Moreover, if Watson commercially uses, offers for sale, or sells its generic version

of VASCEPA[®], or induces or contributes to such conduct, it would further infringe the ‘677 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

64. Plaintiffs will be irreparably harmed if Watson is not enjoined from infringing or actively inducing or contributing to infringement of the ‘677 Patent. Plaintiffs do not have an adequate remedy at law.

Count IV: Patent Infringement of the ‘652 Patent

65. Plaintiffs incorporate by reference the allegations contained in paragraphs 1 to 64 above.

66. United States Patent No. 8,367,652, entitled “METHODS OF TREATING HYPERTRIGLYCERIDEMIA,” was duly and legally issued by the United States Patent and Trademark Office on February 5, 2013. Plaintiff Amarin Pharmaceuticals Ireland Limited is the owner of the ‘652 Patent. A true and complete copy of the ‘652 Patent is attached hereto as Exhibit E.

69. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson’s ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the ‘652 Patent. Upon

information and belief, this infringement will occur at Watson's behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this administration with knowledge that it is in contravention of Plaintiffs' rights under the '652 Patent.

70. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '652 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

71. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the '652 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson's generic version of VASCEPA[®].

72. Watson gave written notice of its certification of invalidity and/or non-infringement of the '652 Patent, alleging that claims of the '652 Patent are invalid and that certain claims would not be infringed by Watson's generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the '652 Patent.

73. Moreover, if Watson commercially uses, offers for sale, or sells its generic version of VASCEPA[®], or induces or contributes to such conduct, it would further infringe the '652 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

74. Plaintiffs will be irreparably harmed if Watson is not enjoined from infringing or actively inducing or contributing to infringement of the '652 Patent. Plaintiffs do not have an adequate remedy at law.

Count V: Patent Infringement of the '920 Patent

75. Plaintiffs incorporate by reference the allegations contained in paragraphs 1 to 74 above.

76. United States Patent No. 8,377,920, entitled "METHODS OF TREATING HYPERTRIGLYCERIDEMIA," was duly and legally issued by the United States Patent and Trademark Office on February 19, 2013. 79. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson's ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the '920 Patent. Upon information and belief, this infringement will occur at Watson's behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this

administration with knowledge that it is in contravention of Plaintiffs' rights under the '920 Patent.

80. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '920 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

169. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson's ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the '372 Patent. Upon information and belief, this infringement will occur at Watson's behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this administration with knowledge that it is in contravention of Plaintiffs' rights under the '372 Patent.

170. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '372 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

171. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the '372 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson's generic version of VASCEPA[®].

172. Watson gave written notice of its certification of invalidity and/or non-infringement of the '372 Patent, alleging that claims of the '372 Patent are invalid and that certain claims would not be infringed by Watson's generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the '372 Patent.

173. Watson has infringed the '372 Patent under 35 U.S.C. § 271(e)(2)(A) by virtue of submitting ANDA No. 205381 with a paragraph IV certification and seeking FDA approval of ANDA No. 205381 to market a generic version of VASCEPA[®] prior to the expiration of the '372 Patent. Moreover, if Watson commercially uses, offers for sale, or sells its generic version of VASCEPA[®], or induces or contributes to such conduct, it would further infringe the '372 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

174. Plaintiffs will be irreparably harmed if Watson is not enjoined from infringing or actively inducing or contributing to infringement of the '372 Patent. Plaintiffs do not have an adequate remedy at law.

This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the '521 Patent. 180. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '521 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

181. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the '521 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson's generic version of VASCEPA[®].

182. Watson gave written notice of its certification of invalidity and/or non-infringement of the '521 Patent, alleging that claims of the '521 Patent are invalid and that certain claims would not be infringed by Watson's generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the '521 Patent.

183. Watson has infringed the '521 Patent under 35 U.S.C. § 271(e)(2)(A) by virtue of submitting ANDA No. 205381 with a paragraph IV certification and seeking FDA approval of ANDA No. 205381 to market a generic version of VASCEPA[®] prior to the expiration of the '521 Patent. Moreover, if Watson commercially uses, offers for sale, or sells its generic version of VASCEPA[®], or induces or contributes to such conduct, it would further infringe the '521 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

184. Plaintiffs will be irreparably harmed if Watson is not enjoined from infringing or actively inducing or contributing to infringement of the '521 Patent. Plaintiffs do not have an adequate remedy at law.

Count XVI: Patent Infringement of the '594 Patent

185. Plaintiffs incorporate by reference the allegations contained in paragraphs 1 to 184 above.

186. United States Patent No. 8,617,594, entitled "STABLE PHARMACEUTICAL COMPOSITION AND METHODS OF USING SAME," was duly and legally issued by the United States Patent and Trademark Office on December 31, 2013. Plaintiff Amarin Pharmaceuticals Ireland Limited is the owner of the '594 Patent. A true and complete copy of the '594 Patent is attached hereto as Exhibit Q.

187. Upon information and belief, Watson submitted ANDA No. 205381 to FDA seeking approval to engage in the commercial manufacture, use, offer for sale, and sale of a generic version of VASCEPA[®] before the expiration of the '594 Patent.

188. Watson's manufacture, use, offer for sale, or sale of such product would infringe the claims of the '594 Patent under 35 U.S.C. § 271(a), (b), and/or (c).

189. Upon information and belief, if approved, the generic VASCEPA[®] product for which approval is sought in Watson's ANDA No. 205381 will be administered to human patients as an adjunct to diet to reduce triglyceride levels in adult patients with severe hypertriglyceridemia. This administration, in turn, would constitute direct infringement, either literally or under the doctrine of equivalents, of one or more claims of the '594 Patent. Upon information and belief, this infringement will occur at Watson's behest, with its intent, knowledge, and encouragement, and Watson will actively induce, encourage, aid, and abet this administration with knowledge that it is in contravention of Plaintiffs' rights under the '594 Patent.

190. Watson's manufacture, use, offer for sale, or sale in the United States, or importation into the United States, of the generic VASCEPA[®] product for which approval is sought in ANDA No. 205381 would actively induce and contribute to infringement of the '594 Patent, and Watson would be liable as an infringer under 35 U.S.C. § 271(b) and/or (c).

191. Upon information and belief, as part of the ANDA filing, Watson purportedly provided written certification to FDA that the claims of the '594 Patent are invalid and/or will not be infringed by the manufacture, use, or sale of Watson's generic version of VASCEPA[®].

192. Watson gave written notice of its certification of invalidity and/or non-infringement of the '594 Patent, alleging that claims of the '594 Patent are invalid and that certain claims would not be infringed by Watson's generic version of VASCEPA[®], and informing Plaintiffs that Watson seeks approval to engage in the commercial manufacture, use, and sale of a product bioequivalent to VASCEPA[®] prior to the expiration of the '594 Patent.
