Defendant.

Civil Action No. _____

COMPLAINT

Plaintiffs Boehringer Ingelheim Pharma GmbH & Co. KG, Boehringer Ingelheim International GmbH, and Boehringer Ingelheim Pharmaceuticals, Inc. (collectively, “Boehringer Ingelheim”) for their complaint against the Honorable David Kappos, state as follows:

NATURE OF THE ACTION

1. This is an action by the assignee of United States Patent No. 7,585,845 (“the ’845 patent,” attached as Exhibit A) seeking judgment, pursuant to 35 U.S.C. § 154(b)(4)(A), that the patent term adjustment for the ’845 patent be changed from 518 days to at least 589 days in view of this Court’s decision in *Wyeth v. Dudas*, 580 F. Supp. 2d 138 (D.D.C. 2008), as set forth below.

2. This action arises under 35 U.S.C. § 154 and the Administrative Procedures Act, 5 U.S.C. §§ 701-706.

JURISDICTION AND VENUE

3. This Court has jurisdiction to hear this action and is authorized to issue the relief sought pursuant to 28 U.S.C. §§ 1331, 1338(a), and 1361, 35 U.S.C. § 154(b)(4)(A) and 5 U.S.C. §§ 701-706.

4. Venue is proper in this district by virtue of 35 U.S.C. § 154(b)(4)(A).

5. This Complaint is timely filed in accordance with 35 U.S.C. § 154(b)(4)(A).

THE PARTIES

6. Plaintiff Boehringer Ingelheim Pharma GmbH & Co. KG is a private limited liability company organized under the laws of Germany, having a principal place of business at Binger Strasse 173, Ingelheim, Germany.

7. Plaintiff Boehringer Ingelheim International GmbH is a holding company organized under the laws of Germany, having a principal place of business at Binger Strasse 173, Ingelheim, Germany.

8. Plaintiff Boehringer Ingelheim Pharmaceuticals, Inc. is a corporation organized under the laws of Delaware, having a principal place of business at 900 Ridgebury Road, Ridgefield, CT 06877.

9. Defendant David Kappos is the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (“PTO”), acting in his official capacity. The Director is the head of the agency, charged by statute with providing management supervision for the PTO and for the issuance of patents. The Director is the official responsible for determining the period of patent term adjustment under 35 U.S.C. § 154.

BACKGROUND

10. Montse Llinas-Brunet, Murray Bailey, Punit Bhardwaj, Josse Bordeleau, Pasquale Forgione, Elise Ghiro, Vida Gorys, Nathalie Goudreau, Sylvie Goulet, Teddy Halmos, and Jean Rancourt are the inventors of the invention claimed in U.S. patent application number 10/850,101 (“the ’101 application”) entitled “Hepatitis C Inhibitor Compounds,” which issued as the ’845 patent on September 8, 2009. The ’845 patent is directed to peptide analogs useful for inhibiting the enzyme NS3 encoded by the hepatitis C virus. The ’845 patent is attached as Exhibit A.

11. Plaintiff Boehringer Ingelheim International GmbH is the assignee of the ’845 patent, as evidenced by the assignment document recorded at Reel 015118, Frame 0178 in the PTO.

12. Section 154 of title 35 of the United States Code requires that the Director of the PTO grant a patent term adjustment in accordance with the provisions of section 154(b). Specifically, 35 U.S.C. § 154(b)(3)(D) states that “[t]he Director shall proceed to grant the

patent after completion of the Director's determination of a patent term adjustment under the procedures established under this subsection, notwithstanding any appeal taken by the applicant of such determination."

13. In determining patent term adjustment, the Director is required to extend the term of a patent for a period equal to the total number of days attributable to delay by the PTO under 35 U.S.C. § 154(b)(1), as limited by any overlapping periods of delay by the PTO as specified under 35 U.S.C. § 154(b)(2)(A), any disclaimer of patent term by the applicant under 35 U.S.C. § 154(b)(2)(B), and any delay attributable to the applicant under 35 U.S.C. § 154(b)(2)(C).

14. The Director made a determination of patent term adjustment pursuant to 35 U.S.C. § 154(b)(3) and issued the '845 patent reflecting that determination. Boehringer Ingelheim filed a Patent Term Adjustment Petition under 37 C.F.R. § 1.705(b) on March 9, 2009, which was dismissed as premature because the '845 patent claims had been allowed, but the patent had not yet issued. On November 3, 2009, Boehringer Ingelheim filed another Patent Term Adjustment Petition in the PTO. That Petition was never acted upon by the PTO. On March 3, 2010, Boehringer Ingelheim filed a Request For Recalculation of Patent Term Adjustment In View Of Wyeth, PTO Form SB/131, seeking additional review of the patent term adjustment determination made by the Director. A copy of Boehringer Ingelheim's Form SB/131 is attached as Exhibit B. The PTO has not yet acted on Boehringer Ingelheim's Form SB/131 submission, which is a newly available option for administrative relief.

15. 35 U.S.C. § 154(b)(4)(A) provides that "[a]n applicant dissatisfied with a determination made by the Director under paragraph (3) shall have remedy by a civil action

against the Director filed in the United States District Court for the District of Columbia within 180 days after grant of the patent. Chapter 7 of title 5 shall apply to such an action.” Boehringer Ingelheim submits this Complaint within the statutory period provided under § 154(b)(4)(A), thereby preserving its rights to judicial relief.

CLAIM FOR RELIEF

16. The allegations of paragraphs 1-15 are incorporated in this claim for relief as if fully set forth.

17. The patent term adjustment for the '845 patent, as determined by the Director under 35 U.S.C. § 154(b) and indicated on the face of the '845 patent, is 518 days. (*See Ex. A at 1*). The determination of this 518 day patent term adjustment is in error because the PTO failed to properly account for delays that occurred after the date that was three years after the actual filing date of the '845 application, pursuant to 35 U.S.C. § 154(b)(1)(B). The correct patent term adjustment for the '845 patent is at least 589 days.

18. The '101 application was filed on May 20, 2004, and issued as the '845 patent on September 8, 2009.

19. Under 35 U.S.C. § 154(b)(1)(A), the number of days attributable to PTO examination delay (“**A Delay**”) is **457 days**. This figure is calculated as follows. The day after the date that is 14 months after the date on which the application was filed under 35 U.S.C. § 111(a) is July 21, 2005. The date of mailing of the first action on the merits under 35 U.S.C. § 132 is October 20, 2006. The number of days beginning on July 21, 2005 and ending on October 20, 2006, is 457 days.

20. Under 35 U.S.C. § 154(b)(1)(B), which concerns the guarantee of prompt PTO responses, the number of days beginning on the date that was three years after the actual filing date of the '101 application is May 21, 2007. Boehringer Ingelheim submitted its first Request for Continued Examination under 35 U.S.C. § 132(b) on July 30, 2007. The number of days beginning on May 21, 2007 and ending on July 30, 2007 is 71 days. Furthermore, the day after the date that is four months after the date on which the issue fee was paid and all outstanding requirements were satisfied is July 10, 2009. The patent issued on September 8, 2009. The number of days beginning on July 10, 2009 and ending on September 8, 2009 is 61 days. The total amount of “**B Delay**” is 71 day + 61 days = **132 Days**.

21. Under 35 U.S.C. § 154(b)(2)(C), the number of days of Applicant Delay is 0 days.

22. 35 U.S.C. § 154(b)(2)(A) provides that “to the extent that periods of delay attributable to grounds specified in paragraph [b](1) overlap, the period of any adjustment ... shall not exceed the actual number of days the issuance of the patent was delayed.” There is no overlap between the “A Delay” period and the “B Delay” period in the prosecution of the '845 patent. There is no period of “A Delay” that occurred between October 20, 2006 (when the first office action was mailed), and May 21, 2007 (the day after the date that is 3 years after the date on which the application was filed). Nor was there any period of “A Delay” that occurred between July 30, 2007 (the date the first Request for Continued Examination was filed) and July 10, 2009 (the day after the date that is four month after the issue fee was paid and all outstanding requirements were satisfied).

23. The '845 patent is not subject to a disclaimer of term. Thus the period of patent term adjustment is not limited under 35 U.S.C. § 154(b)(2)(B).

24. Accordingly, the correct patent term adjustment under 35 U.S.C. § 154(b)(1) and (2) is the sum of the "A Delay" and "B Delay" ($457 + 132 = 589$ days) reduced by the number of days of Applicant Delay (0 days), for a net patent term adjustment of **589 days**.

25. The Director erred in the determination of patent term adjustment by treating the entire period of PTO examination delay — instead of only any period of PTO examination delay that occurred before the date that was three years after the actual filing date of the '101 application — as the period of overlap between the "A Delay" and the "B Delay." Thus, the Director erroneously determined that the net patent term adjustment should be limited by 71 days, and arrived at an incorrect net patent term adjustment of 518 days.

26. In *Wyeth v. Dudas*, 580 F. Supp. 2d 138 (D.D.C. 2008), this Court explained the proper construction of the provisions of 35 U.S.C. § 154(b) for determining patent term adjustment. This construction was recently upheld on appeal. *Wyeth v. Kappos*, No. 2009-1120 (Fed. Cir. Jan. 7, 2010). In accordance with the this Court's decision in *Wyeth*, the patent term adjustment for the '845 patent is properly determined to be 589 days, as explained above.

27. The Director's determination that the '845 patent is entitled to only 518 days of patent term adjustment is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with the law and in excess of statutory jurisdiction, authority, or limitation.

PRAYER FOR RELIEF

Wherefore, Plaintiffs demand judgment against Defendant and respectfully request that this Court enter Orders:

A. Changing the period of patent term adjustment for the '845 patent term from 518 days to 589 days and requiring the Director to extend the term of the '845 patent to reflect the 589 day patent term adjustment.

B. Granting such other and future relief as the nature of the case may admit or require and as may be just and equitable.
