Venue in the Eastern District of New York is proper under 28 U.S.C. §§ 1391 and 1400.

BACKGROUND

7. Intema is the owner by right and assignment of U.S. Patent No. 6,573,103 (the "'103 Patent"), entitled "Antenatal Screening For Down's Syndrome" which issued on June 3, 2003. A copy of the '103 Patent is attached hereto as Exhibit A.

8. Nicholas J. Wald is the named inventor on the '103 Patent and Director of Intema.

9. Intema has been in negotiations concerning the '103 Patent with PerkinElmer since 2001, prior to the issuance of the '103 Patent, when PerkinElmer approached Dr. Wald for a license. Negotiations continued without result and were ongoing until the Defendants filed an improper anticipatory declaratory judgment action on February 5, 2009 in violation of the first-filed rule, captioned *PerkinElmer, Inc. and NTD Laboratories, Inc. v. Intema Limited*, Civil Action No. 1:09-CV-10176-NG (the "Massachusetts Action").

10. On information and belief PerkinElmer and NTD Labs (collectively the "Defendants") have each known of the '103 patent since at least soon after its issuance on June 3, 2003.

12. Count I is an action for infringement arising under Section 271 of the Patent Laws, 35 U.S.C. § 271 et seq. Plaintiff seeks relief for the infringement of the '103 Patent by each of the Defendants.

14. On information and belief, Defendant NTD Labs has directly infringed and/or induced infringement of, continues to directly infringe and/or induce infringement of the '103 Patent by the practice of the methods covered by the claims of the '103 Patent.

15. Having full knowledge of Intema's patent rights, the Defendants' acts of infringement constitute willful infringement of the '103 Patent and are in violation of 35 U.S.C. § 271 et seq. of the Patent Laws.

16. By reason of the foregoing, Intema is being irreparably damaged and will continue to be irreparably damaged unless Defendants PerkinElmer and NTD Labs are enjoined, preliminarily and permanently, from performing, using, selling and/or offering for sale the methods covered by the '103 Patent or otherwise inducing the infringement of the '103 Patent.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff prays for the following relief:

A. That Defendants PerkinElmer and NTD Labs be adjudged to have directly infringed and/or to have induced infringement of the '103 Patent and that such infringement be deemed willful;

B. That each of the Defendants, their respective officers, agents, servants, employees and attorneys and all persons in active concert or participation with any of them who receive

actual notice of the order by personal service or otherwise, be preliminarily and permanently enjoined and restrained from directly infringing and inducing others to infringe the '103 Patent.

C. That Plaintiff be awarded its damages by reason of Defendants' direct infringement and inducing infringement of the '103 Patent in an amount not less than a reasonable royalty;
